Experience

Fyn Tune Solutions (Frontend Developer)   **May 2024 - Present**

- Built **5+ complex** frontend modules for an InsurTech platform, including an employee-level lock-in system, delivering seamless interfaces for brokers managing **2,000+ employers** and **20+ lakh employees.**

- Designed and implemented **3 interactive** communication dashboards (SMS, WhatsApp, Email) in ReactJS, improving client outreach efficiency by **40%** through intuitive UI and optimized data presentation.

- Created dynamic, responsive UIs using **ReactJS**, **Tailwind CSS**, and **JavaScript**, ensuring a consistent user experience across multiple modules and devices.

- Integrated **RESTful APIs** into frontend applications, enabling smooth data flow, secure user interactions, and high application performance.

- Designed and developed the **COI** (Certificate of Insurance) user interface with intuitive workflows for demo user onboarding, improving employer onboarding efficiency and reducing support requests by **25%** .

- Optimized page load performance by implementing **lazy loading** and component-level code splitting in ReactJS, reducing initial load time by **30%** on critical modules.

Skills

HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), ReactJS, Responsive Web Design, RESTful API Integration, Git, Postman

Projects

- **Food Ordering Application** – Built a responsive food ordering interface using ReactJS and Tailwind CSS with menu browsing, cart management, and dynamic order summary.

- **FocusPro (To-Do List Application)** – Developed a task management interface in ReactJS and Tailwind CSS with task creation, status updates, and responsive, user-friendly design.

- **Chat Application** – Built a real-time chat app with ReactJS, Node.js, and Socket.io featuring private rooms and message persistence.

Education

B.Sc. Computer Science

Mulund College of Commerce   (2021 - 2024)
